

Care and Maintenance for your Solid Plastic Products

Keeping your Bradmar solid plastic compartments beautiful for years is easy...here's how!

Bradmar solid plastic compartments come closer to being totally maintenance free than any other toilet compartments on the market today. However, like a freshly painted room, new automobile or any other product that is exposed to use and atmospheric conditions, the compartments will become soiled.

Removing Dirt and Graffiti

Your Bradmar solid plastic products can be easily cleaned by using water from an ordinary garden hose. If this does not do the job, we suggest the following:

- Equip the garden hose with a pressure nozzle.
- Clean stubborn stains and extremely soiled areas with industrial strength cleaner or a mixture of 1/2 cup household detergent, 2/3 cup trisodium phosphate and one gallon of water.

Cuts and Scratches

Repair cuts and scratches by burnishing the surface with a smooth rounded object such as a spoon or a screwdriver handle.

- Using the smooth rounded object, apply pressure to the cut or scratched surface and burnish *with, not against*, the cut or scratch.

Finishing

Spray the surface of the panels and doors with silicone to give your Bradmar product a *like-new* bright and glossy appearance.
