IMPORTANT!

Read this entire installation manual to ensure proper installation. When finished with the installation, file this manual with the owner or maintenance department. Compliance and conformity to local codes and ordinances is the responsibility of the installer. Bradley cannot assume any responsibility for improperly installed units.

Separate parts from packaging and make sure all parts are accounted for before discarding packaging material. If any parts are missing, do not begin installation until you obtain the missing parts.

Make sure that all water supply lines have been flushed and then completely turned off before beginning installation. Debris in supply lines can cause valves to malfunction.

Product warranties may be found under "Products" on our web site at bradleycorp.com.

Supplies Required:

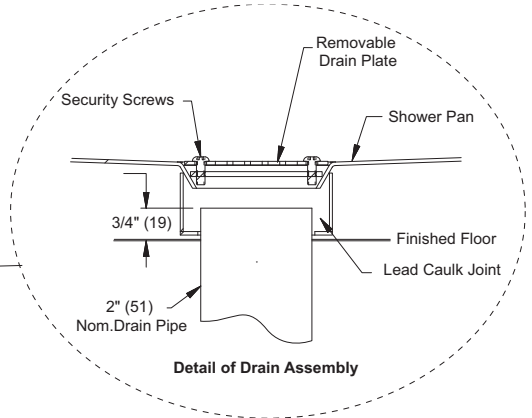

- 1/2" NPT supply pipe
- Caulk (suitable for plumbing applications) for panel seams.
- Supplies required for lead caulk drain joint.
- (3) floor anchors and fasteners for installing optional ramp

Rough in Dimensions and Orientation Information

Floor Drain Rough-In Dimensions

MODEL	DIMENSION A	DIMENSION B
9136KD	36" (914)	18" (457)
9140KD	40" (1016)	20" (508)
9144KD	44" (1118)	22" (559)

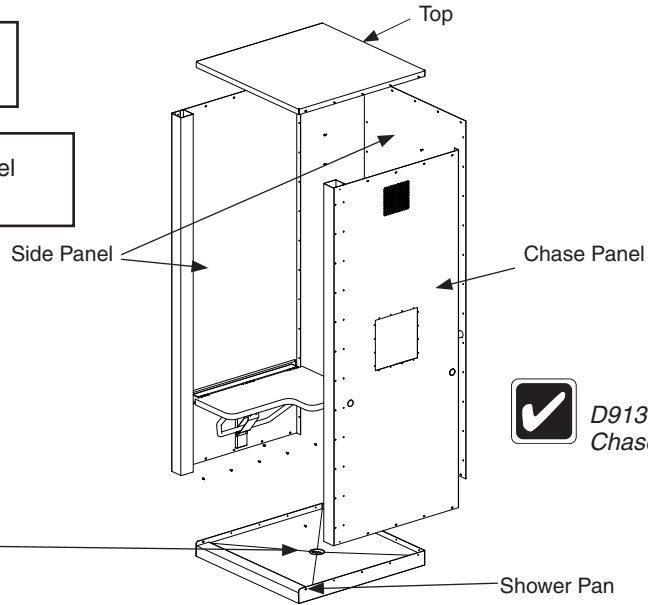

1 Assemble Shower

A Position shower pan over drain.
Connect drain to lead caulk drain joint.

B Bolt the two side panels and chase panel together. **DO NOT TIGHTEN BOLTS.**

C Bolt panels to shower pan. **DO NOT TIGHTEN BOLTS.**

D Bolt top to side panels.
Tighten all bolts after unit is completely assembled.

2 Position Shower and Make Plumbing Connections

A Install push button assembly per instructions included with assembly.

B Connect valve supply tube to 3/8" supply connector before attaching Access Panel Assembly to cabinet.

C Attach Access Panel Assembly to the cabinet with security screws provided.

D Connect the hand-held showerhead/hose assembly.

✓ Caulk around Valve Panel and all seams to seal against water intrusion.

3 Ramp Installation (Optional)

Cleaning Stainless Steel

Material Description: Stainless steel is extremely durable, and maintenance is simple and inexpensive. Proper care, particularly under corrosive conditions, is essential. Always start with the simplest solution and work your way toward the more complicated.

Routine Cleaning: Daily or as often as needed use a solution of warm water and soap, detergent, or ammonia. Apply the cleaning solution per the manufacturer's instructions and always use a soft cloth or sponge to avoid damaging the finish.

Stubborn Stains: To remove stains from stainless steel use a stainless steel cleaner and polish such as Ball® stainless steel cleaner or a soft abrasive. Always follow the manufacturer's instructions and apply in the same direction as the polish lines.

Never use ordinary steel wool or steel brushes on stainless steel. Always use stainless steel wool or stainless steel brushes.

Special Situations for Stainless Steel Material

Fingerprints and Smears: To remove fingerprints or smears use a high quality stainless steel cleaner and polish in accordance with the manufacturer's instructions. Many of these products leave a protective coating that helps prevent future smears and fingerprints.

Grease and Oil: Grease and Oil: To remove grease and oil use a quality commercial detergent or caustic cleaner. Apply in accordance to the manufacturer's instructions and in the direction of the polish lines.

Precautions: Precautions: Avoid prolonged contact with chlorides (bleaches, salts), bromides (sanitizing agents), thiocyanates (pesticides, photography chemicals, and some foods), and iodides on stainless steel equipment, especially if acid conditions exist.

Do not permit salty solutions to evaporate and dry on stainless steel.

The appearance of rust streaks on stainless steel leads to the belief that the stainless steel is rusting. Look for the actual source of the rust in some iron or steel particles which may be touching, but not actually a part of the stainless steel structure.

Strongly acidic or caustic cleaners may attack the steel causing a reddish film to appear. The use of these cleaners should be avoided.

Brand Names

Use of brand names is intended only to indicate a type of cleaner. This does not constitute an endorsement, nor does the omission of any brand name cleaner imply inadequacy. Many products named are regional in distribution, and can be found in local supermarkets, department and hardware stores, or through your cleaning service. It is emphasized that all products should be used in strict accordance with package instructions.
