

Flush Valve with Cover Installation Instructions - Model 7905-31

Steps (Refer to the figures below when installing.)

1. Rough-in pushbutton as shown in the figures below. Cut supply nipple to fit.
2. Place the flush valve cover over flush valve and against the wall so that the pushbutton protrudes through the cover.
3. Using the cover as a template, mark the six wall anchor locations.
4. Install six wall anchors (supplied by installer) at the marked locations.
5. Bolt the cover to the wall using the 1/4"-20 x 1-1/2" security screws supplied.
