• Halo™ and SpinTec™ Deliver the Most Effective Shower and Eye Washdown Coverage and Spray Pattern
• Exceeds ANSI/ISEA Z358.1 Specifications
• Exceeds European EN 15154-2 and EN 15154-1
• Industry’s Only Self-Draining Design – The Aquaduct™
• Separate Supply and Waste Pipes – Meets CEN and Plumbing Requirements
• Ergonomic Hand Activation Eyewash Paddle – Easy to Reach from Any Direction
• Fully-Assembled and Factory-Tested Eyewash with Hinged Dust Covers
• Universal Identification Sign and Inspection Tag Included
• Classified by Underwriters Laboratories Inc. to ANSI/ISEA Z358.1.
• Listed by Intertek to EN 15154-2 and EN 15154-1
• SpinTec showerheads are covered by one or more of the following patents: 8,113,446; 7,806,348; 8,490,895; D669,555; Reg. Comm. Des. D001079560-0001. Other patents pending.
• Halo is Covered by One or More of the Following Patents: 9,700,484; 9,314,398; D662219; D671228. Other Patents Pending.

Specifications
Standard Combination Drench Shower/Eyewash Units save space and fit easily into any work environment. Shower valve operates quickly by a pull rod with a triangular handle. Shower provides a superior washdown with a more even spray pattern. Halo eyewash, operated by an ergonomic, highly visible push handle, provides effective wash down coverage and spray pattern. Integral strainer reduces debris in the water and also prevents clogging.

This plumbing fixture is not intended to dispense water for human consumption through drinking or for preparation of food or beverages.

Pipe and Fittings
Piping to 1-1/4” NPT water supply inlet on unit. Piping to 1-1/4” NPT drain outlet.
1-1/4” piping assembly manufactured of one of the following materials:
• Galvanized steel with BradTect® safety yellow coating

Ball Valve
1” shower ball valve and ½” stay-open eyewash valve manufactured of the following materials and supplied with type 304 stainless steel pull rod and handle:
• Chrome-plated brass

SpinTec™ Showerhead
Standard showerhead is 3.1” (78.7mm) diameter highly visible yellow impact-resistant plastic or optional 10¼” (273mm) diameter corrosion-resistant stainless steel shroud (S19314F). SpinTec drench showerhead features integral 22 GPM (83.3 L) flow control (exceeds minimum water flow of 20 GPM (75.7L) at 30 PSI (2.0 bar)), conserving water and helping to accurately size your tepid water system.

Eyewash
The Halo eyewash system offers a high performance rinsing platform that provides rapid relief to an individual’s eyes that have been injured by chemicals or particulate. The eyewash includes an integral 5.1 GPM (19.2 L) flow control, providing water at a safe velocity while maintaining its effectiveness (exceeds minimum water flow of 0.4 GPM (1.5 L) at 30 PSI (2.0 bar)). The eyewash is protected by flip open dust covers that open when the product is activated by Type 304 stainless steel push handle. Safe, steady water flow under varying water supply conditions from 30–90 PSI (2.0-6.1 bar) is assured by integral flow control in the sprayhead assembly. Sprayheads are made from an impact resistant ABS plastic.

Bowl
Bowl is constructed of Type 304 corrosion-resistant stainless steel.

For information on all available S19314 models, please see tech data document Bradley_SafetyCombi_S19314Series.

Tepid Water Options
Navigator S19-2100_EFX25
Emergency Thermostatic Mixing Valve
Keltech SNA-Series, Tankless Water Heater

Satisfies ANSI/ISEA Z358.1 tepid water requirements.
S19314 shown with Stainless Steel Bowl

All dimensions assume standard thread engagement. Variations in manufacturing allow for +/- 1/8" (3mm) per threaded joint. To find the tolerance of a dimension, add the number of thread joints across the length of the dimension and multiply it by 1/8" (3mm).
