NAVIGATOR

Thermostatic Mixing Valves

Fast, easy installation
for any commercial sink
or lavatory application!

Bradley's Navigator® valves mean easy set up and start up, with a single valve able to accommodate multiple fixtures. Fewer connections and universal mounting capability mean reduced installation time.

And, lead-free means Navigator valves are safer for the environment and safer for drinking water!

Navigator valves are the perfect protection for homes, schools, hospitals or other applications where temperature regulation is a must.

Get the Lead Out Now!

Soon federal standards will limit permissible levels of lead to 0.25 percent in plumbing fixtures that carry drinking water. Bradley's Navigator lead-free thermostatic mixing valves were the first to meet these requirements – and they are third-party certified.

Pre-assembled, 100% factory tested and unparalleled performance. Exactly what you expect from Bradley.

Navigator Thermostatic Mixing Valves

- The only thermostatic mixing valve with a 10-year warranty on thermostat
- All Navigator valves are pre-assembled and 100% tested at factory
- Save time and money on installation, no factory technicians required for Navigator valve installation
- Proven performance and minimal maintenance required
- All valves from Bradley meet ASSE, CSA and/or cUPC requirements
