Foam Soap Dispensers

Lather up the Savings with Foam Soap

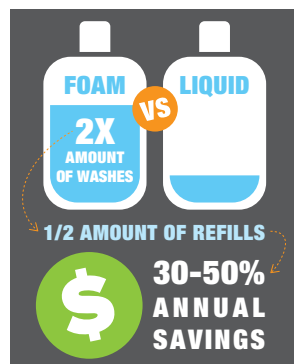

Help customers lather up savings by switching to foam soap. Bradley has the right solution for savings with a comprehensive suite of foam soap dispensers which can save customers up to 50% over liquid soap.

Bradley offers the most complete package of satin finish stainless steel commercial grade dispensers in a variety of styles.

- Compact, space saving footprint
- Uses universal soap for a hassle-free refill
- Convenient sight gauge to determine refill needs
- ADA compliant for applications such as hospitality, retail, day care centers, restaurants, financial institutions, office buildings and regional transportation hubs
- Easy to convert current Bradley liquid soap dispensers to foam
- Less maintenance: extensive testing has shown no leaks, no jams, no clogs

What are the benefits of Foam Soap?

- Foam soap can double the number of hand washes vs liquid soap, saving 30–50% on annual soap costs
- Foam soap provides a superior handwashing experience with better soap coverage and easier rinsing
- With easier rinsing, foam soap is also a proven water saver

Soap is Important

Providing an adequate number of high quality soap dispensers in the restroom can provide a better customer experience.

When Americans were asked what improvement they would most like to see in public restrooms, keeping them better stocked to not run out of things like soap was the third most popular response.

Two thirds of Americans find empty or jammed soap dispensers to be extremely or very aggravating. In addition, according to the CDC, washing hands is the best way to keep germs at bay, yet a common reason people give for not washing their hands in a public restroom is that the soap dispensers were empty or jammed.
