

8B1 Series Elvari™ Grab Bar

Key Features

- High quality and modern style complements other [Elvari™ products](#)
- Non-traditional oval bar with standoff
- Flangeless, concealed mounting
- Optional hooks for personal items, two per bar
- No visible welds or mounting hardware

Product Materials

TUBING: Oval, 1-9/16" H x 1-3/64" W. 18-gauge, 300 stainless steel with a brushed #3 satin finish or optional electrocoat finishes. All exposed welds ground and polished to blend. Each grab bar features welded studs and rectangular standoffs.

STANDOFF: The grab bar standoffs are made from a long-lasting, durable, zinc alloy in a brushed #3 satin finish. Standoff provides 1-1/2" standard safety clearance between wall and bar. Zamak 3 (ASTM AG40A).

HOOKS (Optional): Optional hooks are available for holding personal items. Hooks mount between the wall and back of the standoffs and are constructed of 14-gauge, 300 series stainless steel in a brushed #3 satin finish.

Strength

When properly mounted, all Bradley heavy-duty grab bar systems meet or exceed the requirements of ANSI Standard A117.1, the ADA and ABA Accessibility Guidelines for Buildings and Facilities (ADAAG), and the Uniform Federal Accessibility Standard (UFAS). 8B1 series grab bars are rated to support up to 250 pounds. Wall must be reinforced in the area of the grab bar in order to support the load it is intended to support.

Guide Specification

Oval grab bar shall be fabricated of 18-gauge, 300 series stainless steel in a brushed #3 satin finish with welded end caps. Optional hooks shall be fabricated of 14-gauge, 300 series stainless steel in a brushed #3 satin finish.

A WATTS Brand

8B1 Series Elvari™ Grab Bar

Optional Electrocoat Finishes

Bradley offers an exclusive, proprietary electrocoat color process on the Elvari grab bar models. Unlike powder coating, color is applied to the entire stainless steel part using a submersion process with electrically charged particles. This process results in a precise film thickness across all surfaces, allowing the grain of the stainless steel to show through.

Electrocoat provides complete coverage to the part and has environmental advantages such as no or low-VOC and HAPs (Hazardous Air Pollutants), heavy metal-free products, and minimum waste discharge. Bradley's electrocoat is durable and easy to clean as well as fingerprint, stain and corrosion resistant. A UV light stabilizer additive enhances resistance to weathering and color fade. Products are performance tested for adhesion following ASTM D3359-22 and impact resistance following ASTM D2794.
