MG-2
Express® Lavatory System – MG-Series

- ADA and TAS compliant
- Serves one or two users at a time
- Standard lavatory spacing on 30” centers
- Continuous bowl, sprayhead, and end caps are constructed of Terreon® or Terreon®RE solid surface material
- Available in a variety of colors
- Available in infrared, air valve metering, or TouchTime® mechanical metering

Specifications
The flowing “wave” design accommodates one to two users. Units handle washroom traffic quickly and economically, while providing each user with personal space. Lavatories for the system are positioned on 30” centers. Bradley's continuous bowl features a contemporary flowing “wave” design. This unique “wave” pattern is repeated in the sprayhead, integrating the components. The pre-assembled sprayhead module is equipped with independent aerators, each served by separate infrared sensing module and solenoid valve (Model MG-2/IRP), pushbutton air metering valve (Model MG-2/AST4), TouchTime® mechanical pushbutton (Model MG-2/TTPA) or TouchTime piezo switch (MG-2/TTPB), or independent battery IR sensor and batteries (Model MG-2/BIR3). Operating range is 20–80 psi. Flow restrictor keeps flow rate constant at all pressures.

Product Compliance
Listed by IAPMO R&T to
- Uniform Plumbing Code (UPC)
- National Plumbing Code of Canada
- International Plumbing Code (IPC)
- IGC 156 and the requirements of CSA B45.5/IAPMO Z124 and ASME A112.18.1/CSA B125.1

Listed by NSF International to
- NSF/ANSI 372

Listed by UL Environment to
- GreenGuard Gold

Complies with
- ADA
- ICC/ANSI 117.1
- TAS

Serves the American Disabilities Act and ICC/ANSI 117.1 guidelines, citations 306, 308, 309.4, 606.4, 606.5 when installed according to these requirements. Consult local codes and standards.

This plumbing fixture is designed for hand washing only. It is not intended to dispense water for human consumption through drinking or for preparation of food or beverages.

Verify all rough-in dimensions prior to installation.
Consult local and national codes. Conformity and compliance to local and national codes is the responsibility of the installer.

Activation Types

**Infrared (Model MG-2/IRP)**

The sensor module uses a conical infrared transmitting beam, creating a wide detection area. Adaptive-style sensor shall learn installation environment upon power-up and react (activate) when the user’s hands enter the detection area. Each of the aerators is controlled by a separate, slow-closing solenoid valve. Hands placed within the bowl are detected and will activate a flow of tempered water at a rate of 0.50 gpm (1.9 Lpm). A timing turn-off delay of 2–3 seconds results in a smooth, controlled hand-washing operation. The Bradley adaptive sensor is not affected by varying color tones or darkness. Direct sunlight or bright washroom lights (up to 10,000 foot candles) will not activate the system.

- **Solenoids – 12VDC, 3/8” NPT.** The electronically activated, slow-closing solenoid valve provides reliable performance since there are few moving parts, and its operation is unaffected by most chemicals and minerals often present in municipal water supplies. Neither the solenoid valve nor the infrared sensor module need adjustment for range or timing.

- **Low Voltage Plug-In Adapter – A UL/CSA-listed 120VAC/12VDC plug-in adapter powers the solenoid valves.** The plug-in adapter, furnished as standard equipment, plugs into a standard GFCI protected electrical outlet.

**Battery Infrared (Model MG-2/BIR3)**

Each battery-powered sensor uses a zone-focused infrared transmitting beam, creating a large detection area. The sensor is not affected by varying skin tones or darkness. When hands enter the detection area, the sensor starts water flow by opening the valve electronically. Tempered water flows at a rate of 0.50 gpm (1.9 Lpm). When hands leave the detection area, the sensor stops the flow of water by closing the valve. The 6VDC, electronically activated solenoid valve has few moving parts, providing reliable operation that is unaffected by most chemicals and minerals often present in municipal water supplies. Each station is powered by a single lithium battery. Battery type is Duracell® DL 223A 6V lithium or equivalent (batteries included) with a life expectancy of 4–5 years or approximately 200,000 cycles.

Air Valve Metering (Model MG-2/AST4)

Each pushbutton pneumatically actuates a non-hold-open air metering, single-temperature valve with field adjustable timing from 0–45 seconds. Factory set at 11 seconds. Each pushbutton activates one valve which, in turn, activates one hand washing station at a rate of 0.10 gpc (0.38 Lpc). Push button requires less than five pounds of pressure.

**TouchTime® Mechanical Metering (Models MG-2/TTPA & MG-2/TTPB)**

Each low voltage mechanical pushbutton or piezo switch acts a non-hold-open, slow closing anti-hammer solenoid valve that is timed from an electronic potted assembly. Each push button activates one valve, which, in turn, activates one station flowing tempered water at a rate of 0.10 gpc (0.38 Lpc). TouchTime controls water flow at each station through the use of solid-state, digital circuitry. Timing is factory set at a 15 second run time but is field adjustable to pre-set timeout periods and optional auto-flush function. The 24 hour flush function will activate water flow for a period of 60 seconds any time there has been no activation within the past 24 hours. Push button requires less than five pounds of pressure.

Optional Equipment

**Soap Dispenser Type**

Each horizontally-mounted pump-style valve is located over the drain. Soap tank is located within the stainless steel frame. Soap tank is refillable through an easily accessible exterior filler cap. Filler cap is vandal resistant and opens with special spanner wrench included. Soap tank capacity is ¾ gallon.

### Standard Selections
(Must select one from each category)

**Activation Type**
- **IRP**: Infrared
- **AST4**: Air Pushbutton
- **TTPA**: TouchTime Pushbutton
- **TTPB**: TouchTime Piezo Switch
- **BIR3**: Battery Infrared

**Soap Dispenser Type (select one)**
- **LSD-2**: One Integral Liquid Soap Dispenser (MG-2)
- **NSD**: No Soap Dispenser

**Water Supply Type (select one)**
- **TMA**: Navigator Thermostatic Mixing Assembly (Hot and Cold Supplies)
- **TL**: Single Tempered Line

**Color of Terreon Bowl/Sprayhead Cover (select one)**

- **Standard Colors**
  - **ALP-WHT**: Alpine White
  - **AVAN**: Avalanche †
  - **BONE**: Mesa Bone
  - **CHAR**: Charcoal Gray
  - **COBBLE**: Cobblestone
  - **DRIFT**: Driftwood †
  - **DS-WHT**: Designer White
  - **DUNE**: Sand Dune †
  - **E-GRAY**: Empire Gray
  - **GLACIER**: Glacier
  - **GRAPH**: Graphite
  - **LANNON**: Lannonstone
  - **LONDON**: London Gray
  - **MOONSTONE**: Moonstone †
  - **O-TAUPE**: Organic Taupe
  - **PEBBLE**: Pebble Beach
  - **PEP-WHT**: Peppered White
  - **POLAR**: Polar Ice †
  - **SAND**: Sandtrap
  - **S-CREEK**: Stone Creek
  - **S-MIST**: Silver Mist
  - **WHT-SAND**: White Sand

- **Designer Colors** *(available at an additional charge)*
  - **ARC-CHIP**: Arctic Chip
  - **RIVER**: Riverstone

- **TerreonRE Colors** *(available at an additional charge)*
  - **BIRCH-BARK**: Birch Bark
  - **DUSK**: Dusk

**Optional Selections**

**Waste Assembly Type:**
- **S-CHROME**: Single Chrome-Plated P-Trap
- **S-POLY**: Single Polypropylene P-Trap

*Non-cancelable, non-returnable
† This color contains large, randomly distributed chips.
